

## Science Meets Beauty:

### *New Technology Analyzes Skin Imperfections, Provides Framework for Personalized Facial Rejuvenation Program*

You've probably seen dozens of commercials and ads about products that will help take away the tell-tale signs of aging, but how do you know which one is right for you?

The guesswork has been removed through the use of a revolutionary Digital Skin Analysis tool being offered by Radiance MedSpa of in Wheaton. Using photographic technology, this state-of-the-art diagnostic tool provides clinical measurements of surface and subsurface skin conditions and damage.

The photos capture clear, multi-dimensional images of select facial areas, while examining the severity of various age-related conditions. The imaging highlights areas of fine lines and wrinkles, hyperpigmentation (age/dark spots), enlarged pores, skin tone evenness (color variation), porphyrins (evidence of bacterial growth) and sun damage (UV spots).

A detailed complexion report is generated that focuses on your specific problem areas, compares your results with others in your age group, and includes treatment recommendations specifically for your complexion. The results of the analysis provide the framework for creating a personalized facial rejuvenation programs.

#### **How long does it take to perform a Radiance Digital Skin Analysis?**

Usually the process is completed in one hour. During that time, and in addition to the digital analysis, a physical exam of your complexion is performed by a medical esthetician (or nurse) who also obtains your skincare history to become acquainted with your skincare routine, allergies and any skin health issues. The appointment also includes consultation on what aspects of your skin you want to look better, product and treat-

ment recommendations based on the analysis results, and how you can improve your complexion through nutrition.

#### **Will I need to have another Digital Skin Analysis?**

Your initial Digital Skin Analysis provides a baseline on the health of your skin and is filed in your skincare chart. Depending on your skin condition and goals, additional analysis may be needed to measure the effectiveness of treatment and determine further treatment options.

#### **Will I experience any discomfort during the session?**

No. There is no discomfort involved in the Radiance Digital Skin Analysis.

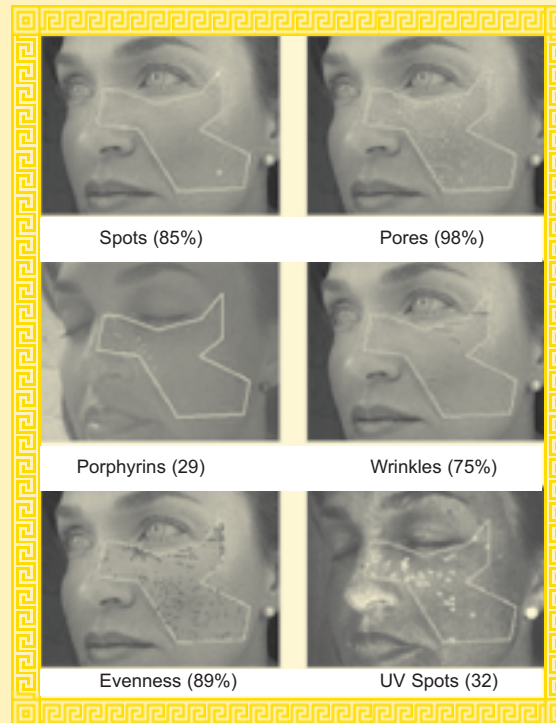

#### **Is there a minimum age recommendation for a Radiance Digital Skin Analysis session?**

No. A Digital Skin Analysis can be done at any age. It is typically done when a skin health issue needs to be addressed with a facial rejuvenation program or a preventative program.

#### **What is the cost of a Radiance Digital Skin Analysis?**

At this time, Radiance Medspa is offering the Digital Skin Analysis as a complimentary service.
